## Objective

I am a motivated and curious software engineer with a strong passion for coding and continuous learning. I actively seek out emerging technologies and tools that enhance Salesforce development, aiming to build scalable, efficient solutions. My goal is to contribute to innovative projects while expanding my expertise in Salesforce engineering.

## Education

- **B-Tech-CSE**  
Sphoorthy Enginnering College  
CGPA:9.2

## Skills

- Problem Solving
- Time Management
- Project Management Skills
- Good Team Player
- Programming Languages: C (Intermediate) Python (Intermediate) Java(Basic)
- Technologies : Html Css JavaScript

## Projects

- **E-Display**  
Project Title: E-Display: Smart Timetable and Attendance System  
Technologies Used: Python, PyQt5, Face Recognition, Text-to-Speech, Real-Time Scheduling  
  
Description:  
Designed and developed a smart classroom display system that manages real-time timetables, dynamic event updates, and automated face recognition-based attendance.
- **Sudoku solver**  
Languages used:Python
- **E-commerce shopping website**  
Languages used :sql, php, html,css
- **Currency Converter**  
Languages Used:Java

## Certifications

- HackerRank:C (Basic)- 2023
- HackerRank: Java(Basic) -2024
- Great Learning: Data Structures in c -2024
- Simplilearn: Introduction to sql-2025

## Languages

- Telugu
- English

## **Hackathons**

- Participated in 36hrs hackathon, sphoorthy Engineering College,2024

## **Extra Circular Activities**

- Champion:Chess,Annual sports, Sphoorthy Engineering College,2024
- Blind Code: Runner up in blind code challenge

## **Internship**

- Android Developer virtual
- AI-ML Virtual
- Website Design and Development
